PROFILE SUMMARY

Software Development Engineer with a strong foundation in distributed system design, workflow orchestration, and production observability. Delivered scalable event-driven architectures using Temporal, Kafka, and BullMQ. Currently pursuing MSc in Computing Science at University of Glasgow, with a focus on machine learning and AI systems.

WORK EXPERIENCE

- Software Development Engineer**, Fynd – Mumbai, IndiaJan 2024 – Aug 2025
 - Played a key role in migrating 9 marketplace integrations to a unified, **Temporal**-orchestrated no-code workflow platform, reducing development cycles.
 - Designed and implemented a resilient, event-driven integration for Amazon VDF using **BullMQ** and **KafkaJS** to process high-volume feed APIs.
 - Built complete test infrastructure (**Jest**, **Specmatic**) and integrated **OpenTelemetry** for distributed tracing across services.
 - Maintained **Kubernetes** and **Docker** infrastructure; improved CI/CD pipelines through shell script automation.
- Software Development Engineer Intern**, Fynd – Mumbai, IndiaOct 2023 – Jan 2024
 - Managed inventory systems and resolved bugs across 9 marketplace integrations.
 - Developed foundational skills in system architecture, testing practices, and observability tooling.

RECENT PROJECTS

- Speech Emotion Recognition**2026
 - Developed a CNN-based classifier to detect emotional states from audio signals, implementing feature extraction pipelines and model evaluation workflows.
- Snake AI Agent**2025
 - Built an autonomous game-playing agent using deep Q-learning with CNN-based state representation, training the model to learn optimal policies through reinforcement learning.
- FormHook Delivery System**2025
 - Fault-tolerant webhook infrastructure featuring distributed job queues, exponential backoff retries, and real-time failure simulation using BullMQ.

EDUCATION

- University of Glasgow** – Glasgow, UKSep 2025 – Present
 - MSc in Computing Science
- Saraswati College of Engineering** – Mumbai, IndiaFeb 2021 – May 2023
 - Bachelor of Engineering in Computer Science (GPA: 8.42 / 10.0)

SKILLS

Languages	Python, JavaScript, C++
Machine Learning & AI	PyTorch, TensorFlow, CNN Architectures
Distributed Systems & Backend	Node.js, Kafka, Temporal, Redis, BullMQ, PostgreSQL, MongoDB
Cloud & DevOps	Kubernetes, Docker, Google Cloud (GCP), Git
Frontend	React, Next.js, Tailwind, Sass
Observability	OpenTelemetry, Grafana, Coralogix
